Computer-Aided Design and Manufacturing U. Rembold 2012-12-06 Manufacturing contributes to over 60 % of the gross national product of the highly industrialized nations of Europe. The advances in mechanization and automation in manufacturing of international competitors are seriously challenging the market position of the European countries in different areas. Thus it becomes necessary to increase significantly the productivity of European industry. This has prompted many governments to support the development of new automation resources. Good engineers are also needed to develop the required automation tools and to apply these to manufacturing. It is the purpose of this book to discuss new research results in manufacturing with engineers who face the challenge of building tomorrow's factories. Early automation efforts were centered around mechanical gear-and-cam technology and hardwired electrical control circuits. Because of the decreasing life cycle of most new products and the enormous model diversification, factories cannot be automated efficiently any more by these conventional technologies. With the digital computer, its fast calculation speed and large memory capacity, a new tool was created which can substantially improve the productivity of manufacturing processes. The computer can directly control production and quality assurance functions and adapt itself quickly to changing customer orders and

new products.

Ecological Indicators for Coastal and Estuarine Environmental Assessment João Carlos Marques 2009-01-01

Ecological indicators address ecosystems structure and/or function and are commonly used to provide synoptic information about their state. Through quantitative representations of either the forces that steer ecosystems, responses to forcing functions, or of previous, current, or future states of an ecosystem, indicators are expected to reveal conditions and trends that will help in development planning and decision making processes. Ecological indicators combine numerous environmental factors in a single value, which may be useful in terms of management and in the development of ecological concepts, compliant with the general public's understanding. Nevertheless, their application is not exempt of criticisms, the first of which is that aggregation results in an oversimplification of the ecosystem under observation. Ecological indicators must therefore be handled following the right criteria and in situations that are consistent with its intended use and scope; otherwise they may drive to confusing interpretations of data.

Het Tweede machinetijdperk Erik Brynjolfsson 2014-10-08 Internationale bestseller over de impact van technologie op ons leven: Google Glasses, zelfrijdende auto's, computers die het menselijk brein vervangen... De digitalisering heeft ons leven drastisch veranderd, en we staan nog maar aan het begin van deze revolutie. 'Vanaf nu wordt de verandering pas echt duizelingwekkend', aldus Erik Brynjolfsson en Andrew McAfee, beiden verbonden aan het prestigieuze MIT. 'En het is aanpassen of verliezen.' Miljoenen mensen dreigen hun baan te verliezen, precaire machtsevenwichten verschuiven en de sociale ongelijkheid groeit. Dit tweede tijdperk der machines kan echter ook zorgen voor meer welvaart. Maar dan moeten we nu de juiste keuzes maken.

A Koiter-type Method for Finite Element Analysis of Nonlinear Structural Behavior Raphael T.. Haftka 1970 The report contains the description of the FORTRAN language program BEHAVE that was used to obtain the numerical results for the example problems that are presented and discussed in Volume I. Program BEHAVE is designed for the analysis of the structural behavior of rigidly jointed planar frames. The finite element used for the analysis is the 'stability' element described in Section IV of Volume I. BEHAVE can perform a linear stability analysis, a Modified Structure method analysis, a direct nonlinear analysis, and combination of the above analyses. This volume consists of three parts: a User's guide; a programmer's manual; and a listing of the program and subroutines.

The Ancient Secret of the Flower of Life Drunvalo Melchizedek 1999-04 Here, Drunvalo Melchizedek presents in text and graphics the first half of the Flower of Life workshop, illuminating the mysteries of how we came to be, why the world is the way it is and the subtle energies that allow our awareness to blossom into its true beauty. Sacred Geometry is the form beneath our being and points to a divine order in our reality. We can follow that order from the invisible atom to the infinite stars, finding ourselves at each step. The information here is one path, but between the lines and drawings lie the feminine gems of intuitive understanding. You may see them sparkle around some of these provocative ideas: Explore the miracle of our existence by meandering through the wonderland of geometry, science, ancient history and new discovery, seen through the widened vision of Drunvalo and the Flower of Life.

Electricity Network Regulation in the EU Leonardo Meeus The UK model of incentive regulation of power grids was at one time the most advanced, and elements of it were adopted throughout the EU. This model worked well, particularly in the context of limited investment and innovation, a single and strong regulatory authority, and limited coordination between foreign grid operators. This enlightening book shows that since 2010 the whole context has changed and regulation has had to catch-up and evolve. The EU is entering a wave of investment, and an era of new services and innovation which has created growing tensions between national regulatory authorities in terms of coordinating technical standards and distribution systems. This is being played out against an increasingly disruptive backdrop of digitization, new market platforms and novel business models.

Tussen de wereld en mij Ta-Nehisi Coates 2015-11-18 WINNAAR VAN DE NATIONAL BOOK AWARD VOOR NON-FICTIE 2015 'Tussen de wereld en mij' is een lange brief van Ta-Nehisi Coates aan zijn vijftienjarige zoon, waarin hij beschrijft hoe het is om als zwarte jongen op te groeien in Amerika. Een Amerika dat zichzelf voorhoudt dat raciale tegenstellingen tot het verleden behoren, maar waar aanhoudende gewelddadige incidenten tegen de zwarte bevolkingsgroep een andere werkelijkheid laten zien. Coates maakt pijnlijk duidelijk hoezeer racisme in de Amerikaanse cultuur zit verankerd en dat gewelddadige uitpattingen geen toevallige incidenten zijn, maar voortkomen uit scheve machtsverhoudingen en diepgewortelde maatschappelijke noties. Hij kijkt vanuit een historisch perspectief en beschrijft hoe raciale gedachten door de eeuwen heen zijn geëvolueerd. Volgens Coates is racisme vooral een fysieke ervaring, waarbij de lijfelijke dreiging tegen 'black bodies' telkens een andere vorm aanneemt: van slavernij en opsluiting tot buitensporig politiegeweld. Hij neemt de lezer aan de hand mee door zijn leven. Daarbij probeert hij één vraag te beantwoorden: is het in Amerika mogelijk om geweldloos in een zwart lichaam te leven?

The Home Distiller's Workbook Jeff King 2012-02-22 The Home Distiller's Workbook tackles the often

misunderstood and misrepresented world of moonshine and distillation and reduces them to such simple concepts that even a first time “Shiner” can understand. The HDW will introduce you to the three basic steps in making your own artesian crafted spirits; brewing, distilling and ageing. We will be tackling these steps one by one in a way that will have you saying “I just can't believe it was that easy.” And the truth is that it's even easier than that. If you can follow a recipe to make a cake then with the help of the HDW you could be making anything from Moonshine to Vodka on your kitchen stove!
