Contracts: Cases and Materials John Edward Murray Jr. 2006-07-26 This casebook is designed to meet the challenges of providing students with the most current and comprehensive analysis of modern contract law within the time constraints of the modern law school curricula. The Sixth Edition is a slimmer volume though its scope has not changed. In many ways it is more comprehensive than the last edition. While it includes the most current judicial and statutory developments, the enhanced use of problems interacting with text material allows students to gain a clear and sophisticated understanding of some of the more complex concepts in fewer classroom hours. Today's student is asked to assimilate all of the basic concepts to which students in the past have been exposed as well as a host of new developments. To meet these challenges, this edition includes problems and questions surrounded by text referring to case law and other authorities in a fashion that allows the student to pursue preparation as well as the classroom experience in a highly productive fashion. Notwithstanding these innovations, the essential nature of the book has not changed. It is a casebook. New cases replacing cases in the prior edition demonstrate a high pedagogical value. The overriding purpose is to provide the student with the maximum opportunity to develop a comprehensive understanding of contract law in the 21st century that will be sufficient for long-term career success. Contract law will continue to evolve. It is important to provide the student with a vehicle promoting a sophisticated understanding of the subject in a fashion that will allow the student to assimilate future developments with justifiable confidence.

Handbook of Research on International Consumer Law Geraint G. Howells 2010 This is a truly international effort, and one with a strong commitment to human rights by the highly reputable authors coming from different jurisdictions! The many facets of today's consumer law are presented to the reader, including developing countries a fascinating effort in a dynamically emerging field of law! We are comprehensively informed about such bread and butter areas as advertising, unfair terms, consumer guarantees, product safety and liability, consumer credit, and redress. But traditional consumer law concepts and remedies are facing challenges in more complex areas, like services of general internet where consumers and private users should enjoy equal access to universal

services , with the internet where speed must not be a pretext to eliminate standards of fair dealing, with risky investment services under the problematic paradigm shift from investor protection to investor confidence . A book to read, to think about, to work with for everybody interested in the future of consumer markets and law in a time of economic crisis! Norbert Reich, University of Bremen, Germany This is a richly interesting collection of essays, written by leading names in the field. It offers a thoroughly reliable survey of key tensions and challenges in modern consumer law and brilliantly combines thematic overview with detailed analysis. It will stimulate comparative thinking, it will provide a source of information and it will be welcomed by consumer law scholars all over the world. Stephen Weatherill, University of Oxford, UK Consumer law and policy has emerged in the last half-century as a major policy concern for all nations. This Handbook of original contributions provides an international and comparative analysis of central issues in consumer law and policy in developed and developing economies. The Handbook encompasses questions of both social policy and effective business regulation. Many of the issues are common to all countries and are becoming increasingly globalised due to the growth in international trade and technological developments such as the Internet. The authors provide a broad coverage of both substantive topics and institutional questions concerning optimal approaches to enforcement and the role of class actions in consumer policy. It also includes comparative insights into the influential EU and US models of consumer law and relates consumer law to contemporary trends in human rights law. Written by a carefully selected group of international experts, this text represents an authoritative resource for understanding contemporary and future developments in consumer law. This Handbook will provide students, researchers and policymakers with an insight to the main policy debates in each context and provide models of legal regulation to assist in the evaluation of laws and the development of consumer law and policy.

Practitioner's Handbook on International Arbitration and Mediation - Third Edition Richard Chernick 2012-04-01 The Practitioner's Handbook on International Arbitration and Mediation, 3rd Edition is a unique work with each chapter written by a well-known practitioner and expert in the field. It covers each step of the international arbitration and mediation process and offers separate chapters that summarize the laws of leading arbitral venues. This Handbook is intended to make the reader into a better practitioner or arbitrator/mediator. Moreover, each chapter has been written to provide practical advice and guidance. Unlike many works with multiple authors, this work is not simply a collection of essays on a general subject. This book is a unified work with cross references among the chapters and a consistent format throughout. The Practitioner's Handbook is divided into three parts. Part One describes in detail each step of the international arbitration process and offers tips. Part Two deals with each step and facet of an international mediation. Each of these chapters is filled with Practitioners' Expert Commentary. Part Three summarizes the laws of leading arbitral jurisdictions, like Hong Kong, England, Switzerland, and France. These chapters give you detailed guidance on the laws governing international arbitration in that particular jurisdiction. As a result, the chapters in Part Three are a bit more technical as the authors realized that the reader would need citations to and commentary on the local arbitration statutes and rules. The CD ROM that accompanies this Work contains relevant original source material that is germane to the text. A review of the table of contents of the material contained on the CD ROM will acquaint you with the range of material covered.

The FIDIC Forms of Contract Nael G. Bunni 2013-02-05 In September 1999, FIDIC introduced its new Suite of Contracts, which included a “new” Red, Yellow, Silver and Green forms of contract. The “new” Red Book was intended to replace the 1992 fourth edition of the Red Book, with the ambition that its use would cease with time. This ambition has not materialised and is unlikely to do so in the future. Despite the importance of the 1999 Forms, there has been very little published on the new concepts adopted in them and how they interact with the previous forms. This important work considers these aspects together with the many developments affecting the fourth edition of the Red Book that have taken place since 1997, when the second edition of this book was published, and relates them to key contracting issues. It is written by a chartered engineer, conciliator and international arbitrator with wide experience in the use of the FIDIC Forms and in the various dispute resolution mechanisms specified in them. Important features of this book include: · background and concepts of the various forms of contract; · a detailed comparison of the wording of the 1999 three main forms, which although similar in nature; it nevertheless significantly differs in certain areas where the three forms diverge due to their intended purpose; · analysis of the rights and obligations of the parties involved in the contract and the allocation of risks concerned; · a range of ‘decision tree’ charts, analysing the main features of the 1992 Red Book, including risks, indemnities and insurances, claims and counterclaims, variations, procedure for claims, programme and delay, suspension, payments and certificates, dispute resolution mechanisms, and dispute boards; · a much enlarged discussion of the meaning of “claim” and “dispute” and the types of claim with a discussion of the Notice provision in the 1999 forms of contract for the submission of claims by a contractor and by an employer; · the FIDIC scheme of indemnities and insurance requirements; and the methods of dispute resolution provided by the various forms of contract; and · five new chapters in this third edition, the first four chapters deal with each of the 1999 forms and the fifth chapter is confined to the topic of Dispute Boards.

International Commercial Disputes Jonathan Hill 2014-11-24 This is the fourth edition of this highly regarded work on the law of international commercial litigation as practised in the English courts. As such it is primarily concerned with how commercial disputes which have connections with more than one country are dealt with by the English courts. Much of the law which provides the framework for the resolution of such disputes is derived from international instruments, including recent Conventions and Regulations which have significantly re-shaped the law in the European Union. The scope and impact of these European instruments is fully explained and assessed in this new edition. The work is organised in four parts. The first part considers the jurisdiction of the English courts and the recognition and enforcement in England of judgments granted by the courts of other countries. This part of the work, which involves analysis of both the Brussels I Regulation and the so-called traditional rules, includes chapters dealing with jurisdiction in personam and in rem, anti-suit injunctions and provisional measures. The work's second part focuses on the rules which determine whether English law or the law of another country is applicable to a given situation. The part includes a discussion of choice of law in contract and tort, with particular attention being devoted to the recent Rome I and Rome II Regulations. The third part of the work includes three new chapters on international aspects of insolvency (in particular, under the EC Insolvency Regulation) and the final part focuses on an analysis of legal aspects of international commercial arbitration. In particular, this part examines: the powers of the English courts to support or supervise an arbitration; the effect of an arbitration agreement on the jurisdiction of the English courts; the law which governs an arbitration agreement and the parties' dispute; and the recognition and enforcement of foreign arbitration awards.

Contracts Ben Templin 2019-02-21 Contracts: A Modern Coursebook, Second Edition by Ben Templin is an innovative coursebook unlike any other on the market. The book takes a hybrid approach between a "traditional" casebook and a problems-based casebook, incorporating a more thorough discussion of the law followed by cases then problems. Featuring a unique design that engages the reader and incorporates professional skills and experiential-type learning, Contracts: A Modern Coursebook is a revolutionary, classroom-tested book. Rather than playing "hide the ball," professors using this book will be able to say, "Here's the ball. Let's play catch." New to the Second Edition: Now Over 500 Questions and Problems, nearly doubling the number of questions and answers for professors to use to assess students. A new section—Questions for Review—tests students' understanding of the law before they try the more difficult analytic problems. Enhanced analytic problems—updated based on feedback from professors and students New cases with tighter editing to adjust the mix between classic and contemporary cases for greater balance, and to focus on the core lesson More flowcharts and tables, providing additional visual learning aids to help students synthesize concepts More examples and case illustrations to keep students engaged and to stimulate critical thinking Design enhancements, including a redesign of "Rule Boxes" that makes parsing the rule statements easier for students A new numbering system to more easily track "Learning Outcomes" to "Explanations" to "Case Law" to "Assessments" Professors and students will benefit from: Learning Objectives: Unlike traditional casebooks, every chapter begins with three to seven precise learning goals. Millennials respond positively when learning objectives are stated at the beginning of a lesson. The defined learning objectives for each chapter help professors comply with ABA requirements to establish learning outcomes that consist of "clear and concise statements of knowledge that students are expected to acquire." Clear and Concise Explanations of the Law: Much like a hornbook, every chapter provides clear and concise explanations of the law. Overarching rules are identified and highlighted visually. An analytical framework is provided to help students parse the rule. Examples and Case Illustrations explain the parameters and application of the rule. Test Yourself questions are embedded exercises within the explanation section to let students assess their understanding of the rules. Case Law—Developing Critical Reasoning Skills: Since students learn the law before reading the cases, the focus of case analysis is on the reasoning that the court applies. By posing direct questions and giving students prompts to respond to as they read the case, students build critical reasoning skills, and, as a result, are better prepared for class. Problem Solving and Analysis—Built-in Formative Assessment: At the end of each chapter, the Problem Solving and Analysis section provides students the opportunity to build critical thinking skills (the highest level of Bloom's Taxonomy of Educational Objectives) through a series of thought-provoking hypotheticals based on real-world scenarios. The rich set of questions builds accountability and addresses the challenge of providing in-semester formative feedback to large classes to help professors comply with ABA formative assessment standards. Contemporary Layout and Design: The contemporary book design is optimized to improve readability, heighten student engagement, and increase retention. Concise and Compact: Shorter than competing casebooks, the casebook can be used in 4-credit, 5-credit, or 6-credit courses. Classroom Tested: Contracts: A Modern Coursebook has been classroom tested over three years. More than 400 students have used the text for both the first year contracts course and as a supplement for a third year remedies course. Students have been overwhelmingly enthusiastic about the content, format, and approach. The purchase of this Kindle edition does not entitle you to receive access to the online e-book, practice questions from your favorite study aids, and outline tool available through CasebookConnect.
