Liefde & gelato Jenna Welch 2016-07-05 Naar Italië ga je voor liefde en gelato, maar soms vind je meer dan dat... Lina brengt de zomer door in Toscane, maar aanvankelijk is ze niet erg in de stemming voor de Italiaanse zon en het prachtige landschap. Eigenlijk is ze er alleen maar omdat het haar moeders laatste wens was dat ze naar Italië zou gaan om haar vader te leren kennen. Maar welke vader laat nou zestien jaar lang niets van zich horen? Alles wat ze wil is zo snel mogelijk weer naar huis gaan. Maar dan krijgt

ze een dagboek in handen, waarin haar moeder schrijft over haar tijd in Italië én haar geheime liefde. Vanaf de eerste pagina is Lina gefascineerd en wil ze de geheimen van het dagboek ontrafelen. Daarvoor heeft ze wel wat Italiaanse hulp nodig. Enter buurjongen Lorenzo... Een prachtig verhaal waarin twee liefdesgeschiedenissen op een geraffineerde wijze met elkaar worden verweven. 'In Liefde & gelato word je verwend met heerlijke, verleidelijke beschrijvingen van Renaissancearchitectuur en Italiaans eten.' - Kirkus 'Een tripje naar Toscane? Geheime liefdes, kunst én Italiaanse ijsjes? Verkocht!' - Waiting on Wednesday

Drive Daniel Pink 2010-10-11 Vergeet alles wat je weet over hoe je mensen moet motiveren, het zit anders in elkaar dan je dacht. Het geheim van goed presteren, plezier en zin in je leven en werk is de intrinsieke motivatie. Dat is je diepe wens om je eigen leven te bepalen, nieuwe dingen te leren en te creeren en bij te dragen aan zinvolle zaken. Daniel Pink toont aan dat de geaccepteerde wijsheid over mensen motiveren niet strookt met hoe wij thuis en op het werk elke dag te werk gaan. De oude manier van belonen en straffen werkt voor de meeste taken niet meer. Kijk maar naar de bonuscultuur bij bedrijven: een slecht middel voor een goed doel. Het gevolg van verkeerde beloning is dat we slechte kwaliteit leveren en uiteindelijk minder betrokken raken bij wat we doen. 'Een van de goeroes van morgen' Management Team Over Een compleet nieuw brein: Dit boek is een wonder. Volstrekt origineel en diepgravend Tom Peters, auteur van Excellente ondernemingen Dit is een van die zeldzame boeken die een omslagpunt markeren, een boek dat je wilt lezen voordat iemand anders het leest Seth Godin, auteur van Purple Cow Daniel Pink schrijft over technologie en het zakenleven in onder meer The New York Times, Fast Company en Wired. Hij schreef ook de succesvolle boeken Een compleet nieuw brein en De avonturen van Johnny Bunko: de eerste carrieregids in stripvorm. Choreographing History Susan Leigh Foster 1995-05-22 "... I have used essays from the book to help dance graduate students push their thinking beyond the studio and their own physical experience and to realize the varied resources, approaches, and theoretical positions possible in writing about the body." -- Dance Research Journal "Choreographing History... assembles an impressive diversity of sites, disciplines and critical approaches... [and] includes not only historical bodies and discourses, but also the very bodies of the historians themselves." -- Parachute "This volume is not only full of gems (the very lineup of preeminent scholars is impressive), but is also a neat cross-section of the academic conventions and mannerisms of our time." -- Dance Chronicle "... [an] important step... in the ineluctable dance by postmodern historians across a bridge that spans the gaps among disciplines, between theory and practice, and betweeen present and past." -- Theatre Journal Historians of science, sexuality, the arts, and history itself focus on the body, merging the project of writing about the body with theoretical concerns in the writing of history.

Sustainable Brownfield Regeneration Tim Dixon 2008-04-15 Sustainable Brownfield Regeneration presents a comprehensive account of UK policies, processes and practices in brownfield regeneration and takes an integrated and theoretically-grounded approach to highlight best practice. Brownfield regeneration has become a major policy driver in developed countries. It is estimated that there are 64,000 hectares of brownfield land in England, much of which presents severe environmental challenges and lies alongside some of the most deprived communities in the country. Bringing such land back into active use has taken on a new urgency among policymakers, developers and other stakeholders in the

development process. Frequently, however, policy thinking and practice has been underpinned by 'silo' mentalities, in which integrated and multidisciplinary approaches to problem-solving have been limited. The book has two principal aims. The first is to examine the ways in which science and social science research disciplines can be brought together to help solve important brownfield regeneration issues, with a focus on the UK. The second is to assess the efficiency and effectiveness of different types of regeneration policy and practice, and to show how 'liveable spaces' can be produced from 'problem places'. The Thames Gateway in the south of England and Greater Manchester in the North of England are shown as examples of how brownfield regeneration projects are developing in an era where sustainability is high on the policy agenda. From the Foreword by Paul Syms, National Brownfield Advisor, English Partnerships: 'Ensuring the effective and efficient reuse of brownfield land is an essential part of the British Government's land use policies in support of sustainable communities. [This book] recognises that reusing brownfield land is not just about over-coming technical issues to remove contamination or other physical problems with the ground. It highlights the importance of engaging with the many different stakeholders whose opinions and concerns need to be taken into account if sustainable outcomes are to be achieved. The authors also recognise that brownfield land reuse is not just about building new homes or places of employment – the creation of new green spaces can be just as important.'

Postdigital Dialogues on Critical Pedagogy, Liberation Theology and Information Technology Peter McLaren 2020-04-16 Postdigital Dialogues on Critical Pedagogy, Liberation Theology and Information Technology presents a series of dialogues between Peter McLaren, a founding figure of critical pedagogy, and Petar Jandric, a transdisciplinary scholar working at the intersections between critical pedagogy and information technology. The authors debate the postdigital condition, its wide social impacts, and its relationship to critical pedagogy and liberation theology, as part of a transdisciplinary effort to develop a new postdigital revolutionary consciousness in the service of humanity. Throughout

the dialogues we see how McLaren's thinking on critical pedagogy and liberation theology have developed since the publication of Pedagogy of Insurrection, and how these developments play out in Jandric's theory of the postdigital condition. The book includes a foreword by Peter Hudis and an afterword by Michael A. Peters.

Handbook of Imagination and Culture Tania Zittoun 2017-09-01 Imagination allows individuals and groups to think beyond the here-and-now, to envisage alternatives, to create parallel worlds, and to mentally travel through time. Imagination is both extremely personal (for example, people imagine unique futures for themselves) and deeply social, as our imagination is fed with media and other shared representations. As a result, imagination occupies a central position within the life of mind and society. Expanding the boundaries of disciplinary approaches, the Handbook of Imagination and Culture expertly illustrates this core role of imagination in the development of children, adolescents, adults, and older persons today. Bringing together leading scholars in sociocultural psychology and neighboring disciplines from around the world, this edited volume guides readers towards a much deeper understanding of the conditions of imagining, its resources, its constraints, and the consequences it has on different groups of people in different domains of society. Summarily, this Handbook places imagination at the center, and offers readers new ways to examine old questions regarding the possibility of change, development, and innovation in modern society.

Web-based Education Anil Aggarwal 2003-01-01 Successful use of information and communication technologies depends on usable designs that do not require expensive training, accommodate the needs of diverse users and are low cost. There is a growing demand and increasing pressure for adopting innovative approaches to the design and delivery of education, hence, the use of online learning (also called E-learning) as a mode of study. This is partly due to the increasing number of learners and the limited resources available to meet a wide range of various needs, backgrounds, expectations, skills, levels, ages, abilities and disabilities. The advances of new technology and communications (WWW, Human Computer Interaction and Multimedia) have made it possible to reach out to a bigger audience around the globe. By focusing on the issues that have impact on the usability of online learning programs and their implementation, Usability Evaluation of Online Learning Programs specifically fills-in a gap in this area, which is particularly invaluable to practitioners.

Microbial Decontamination in the Food Industry Ali Demirci 2012-06-26 The problem of creating microbiologically-safe food with an acceptable shelf-life and quality for the consumer is a constant challenge for the food industry. Microbial decontamination in the food industry provides a comprehensive guide to the decontamination problems faced by the industry, and the current and emerging methods being used to solve them. Part one deals with various food commodities such as fresh produce, meats, seafood, nuts, juices and dairy products, and provides background on contamination routes and

outbreaks as well as proposed processing methods for each commodity. Part two goes on to review current and emerging non-chemical and non-thermal decontamination methods such as high hydrostatic pressure, pulsed electric fields, irradiation, power ultrasound and non-thermal plasma. Thermal methods such as microwave, radio-frequency and infrared heating and food surface pasteurization are also explored in detail. Chemical decontamination methods with ozone, chlorine dioxide, electrolyzed oxidizing water, organic acids and dense phase CO_2 are discussed in part three. Finally, part four focuses on current and emerging packaging technologies and post-packaging decontamination. With its distinguished editors and international team of expert contributors, Microbial decontamination in the food industry is an indispensable guide for all food industry professionals involved in the design or use of novel food decontamination techniques, as well as any academics researching or teaching this important subject. High-Tech Trade Wars Sara Schoonmaker 2002-07-07 Focusing on the conflicts between the United States and Brazilian governments over Brazil's efforts to develop a local computer industry, High-Tech Trade Wars examines the political struggle between governments and multinational corporations in today's global economy. Sara Schoonmaker uses the technology industry to delve into one of the key political conflicts of our time: the construction of a free trade regime determined to open markets around the world to global capital, and attempts by Latin American, African, and other governments to resist this process. The Brazilian computer case is a prime example of a nationalist effort to promote local growth of a key high-technology industry—an effort that was eventually dismantled under the pressures of what Schoonmaker views as part of a broader process of neoliberal globalization. High-Tech Trade Wars presents a multidimensional view of the globalization process, where economic changes are shaped by political struggle and cultural discourse. It includes interviews with Brazilian industrialists and state officials involved with implementing and, eventually, dismantling Brazil's informatics policy, and discussions of grassroots-level protests organized against neoliberal globalization during the recent WTO

Sport and Exercise Psychology Stewart Cotterill 2016-06-13 SPORT AND EXERCISE PSYCHOLOGICAL "This book is a joy to read and greatly needed. The overall scholarly quality is very strong, and the chapters are clear, accessible, helpful and interesting - a rare combination. There are few texts that examine sport and exercise from a practitioner's perspective, and fewer that help students and trainees navigate the complex terrain of practice. The editors should be congratulated on pulling together a book that educates, inspires, provokes, and will be of practical use." Professor Brett Smith, School of Sport, Exercise and Rehabilitation Sciences, University of Birmingham Sport and Exercise Psychology: Practitioner Case Studies is a contemporary text focusing on current issues in the discipline of sport and exercise psychology. Integrating research and practice in order to develop a coherent understanding of existing knowledge, future research directions and applied implications within the field, the text explores issues pertinent to the applied practitioner/supervisor and draws on expert commentary to investigate potential solutions to many key issues. Each chapter uses a case study approach to allow internationally recognized contributors to highlight and evaluate their experience across a broad range of sport and exercise performance areas. Practitioners are provided with a full range of available interventions to address specific types of psychological issue including performing under pressure, working with teams, injury rehabilitation, working with coaches, mental toughness, career transitions, athlete well- being,

physical activity promotion, exercise and body image, lifestyle interventions, exercise dependence, and motor learning and control. Sport and Exercise Psychology is supported by a range of online materials designed to help both study and practice. It presents content that is directly applicable to those seeking to enter the profession, and which can also inform the ongoing development of reflective practitioners.
